SITUATION SUMMARY

Cal OES Activation Status

State Operations Center

Normal Operations

Inland Region EOC

Normal Operations

Coastal Region EOC

Normal Operations

Southern Region EOC

Normal Operations

Statewide Winter Weather Event

Steady rain and gusty winds will continue today. Another 1 to 3 inches of rain is expected over the Camp Fire burn scar with this system. Thunderstorms are NOT expected, and rainfall rates should remain below critical thresholds. Drier conditions will develop on Thursday. The next chance of precipitation will be over the weekend.

Burn Scar Thresholds for Northern and Southern California

- NWS and NOAA are not predicting that the current storms will reach these debris flow rainfall rate thresholds.
- Involved OAs, along with state and federal partners are continuing to monitor the storms as they come in and are ready to respond if necessary.

Cal OES INLAND REGION

- See Statewide Winter Weather Event

Cal OES COASTAL REGION

Hydraulic Fluid Release, Lakeport, Lake County, SPILL: 19-0201

On 01/09/19 at 0820 hours the California State Warning Center (CSWC) received a report from the City of Lakeport Police Department advising that 20-50 gallons of Oil or Hydraulic Fluid was released from a garbage truck with a blown line due to unknown causes.

- The release is stopped.
- CSWC personnel performed notifications per SOP.
- Per the Cal OES Coastal Region Duty Officer (CDO) on 01/09/19 as of 0937 hours:
 - The release is impacting the lake.
 - City of Lakeport EOC is activated at Level I (Full), Operational Hours: 0800 until resolved or further notice.
 - There are no requests for State assistance.

Cold Weather Event, Coastal Counties (FINAL)

Due to the warmer overnight temps into the 40's in most areas, cold weather response plans have been lifted. Counties will re-activate cold weather plans and extra beds throughout the season, according to temperature thresholds.

- Humboldt will keep shelter availability open but no cold weather plan is active. Warming Center locations will run as regular business hours for people to get out of inclement weather.
- The Cal OES CDO will continue to monitor in the region.

SITUATION SUMMARY

Cal OES SOUTHERN REGION

Mudslide, State Route 23, Los Angeles County

On 01/07/19 at 0957 hours, the California State Warning Center (CSWC) was notified by Caltrans that mudslides occurred on State Route 23. The route is currently closed from the junction of State Route 1 to 6.7 miles north of State Route 1 and Mulholland Hwy.

- This is not a lifeline route.
- Alternate routes are available.
- These mudslides occurred in the Woolsey burn area.
- No request for state assistance at this time.
- No estimated time of reopening.

WEATHER OF CONCERN

NORTHERN CALIFORNIA

- Flood Watch for portions of Siskiyou County below 6,000 feet through 2200 hours today.
 - Landslides and debris flows are possible during this flood event. People, structures and roads located below steep slopes, in canyons and near the mouths of canyons may be at serious risk from rapidly moving landslides.
 - Recent severely burned areas will also be at risk of debris slides.
- Rain is possible today over the burn scar, but will be isolated in nature.
- Rain and mountain snow will continue to push through the Sierra this morning with very light rain for western Nevada valleys.
 - Accumulating snow on Sierra passes will cause difficult travel today.

SOUTHERN CALIFORNIA

- Additional storm systems will impact the region mid to later this week.

Weather Advisories, Watches, and Warnings currently active in California:

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca>

Active Weather Warnings, Watches and Advisories by County:

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

Key Points

01/09/19 - 01/15/19

Wednesday

- Breezy south winds across northern coastal areas and far northern CA with gusts to of 40 to 60 mph across the coast and inland
 - Driving could become hazardous, especially for high profile vehicles. Trees and power lines could be damaged.
- Travel will be impacted over the northern Sierra due to snow
 - 8 to 16 inches of snow above 6500 feet, locally up to 2 feet over the highest peaks
- Rain totals of up to 0.25 inches Central Valley with 0.50 to 1.50 inches along the central and northern coastal areas, foothills and mountains
 - No debris flow impacts on recent burn scars

Thursday

- Lingering showers in the morning across northern CA. Otherwise, dry conditions with no significant impacts

Key Points

01/09/19 - 01/15/19

Friday - Tuesday

- Southwesterly winds will increase on Friday ahead of the next weather system
- Precipitation possible late Friday into Saturday with another weather system moving in Sunday through Tuesday
 - Valley rain and mountain snow likely during this period which may impact travel
 - Locally heavy rain and isolated thunderstorms possible with potential debris flow impacts. Confidence is high on the wet weather but exact location of the heaviest rain and precipitation amounts are uncertain at this time.
